

# Undergraduate Project

## 1.USV(Unmanned Surface Vehicle)

Date: 2019.10 - 2020.3 [Doc](#) [PPT](#) [Video](#)

**Introduction:** The project designed an **Unmanned Surface Vehicle(USV)** with functions such as surface path planning, autonomous cruise, surface image monitoring and return, and autonomous recognition of surface garbage; In 2020, our USV Project participated in the **National University Student Social Practice and Science Contest on Energy Saving Emission Reduction** and won the **third prize**.

## 2.Underwater Robot

Date: 2020.6 - 2020.10 [Code](#)

Introduction: We designed an Underwater Robot that can **adapt to dive** in the underwater environment and **detect and track the pipeline**; In 2020, our **Underwater Robot Project** represented Hefei University of Technology to participate in the **International Underwater Robot Competition**, and finally won the 3rd.

### 3.ROBOMASTER

Date: 2019.9 - 2021.4 [Code](#) [Video](#) [Doc-2021](#)

Introduction: In 2019, my friends and I established the robot team of Hefei University of Technology to represent Hefei University of Technology in the **RoboMaster Robotics Competition**. I served as **the leader of the vision team** for two years, and our team won the **second prize** for two consecutive years, the entire robot team consists of **more than 60 students**.

### 4.Intelligent Sorting Trash Can

Date: 2020.3 - 2020.6 [Code](#) [Video](#)

Introduction: We have designed an **Intelligent Sorting Trash Can**, which can recognize thirty kinds of items, divide them into four categories (Recyclable waste, Kitchen waste, Hazardous waste and Other waste), and automatically classify them; The project won the third prize of **Anhui Province in the China College Students Engineering Practice and Innovation Ability Competition**.

## 5. Automatic Tracking, Identification and Measuring Device

Date: 2020.10.10 8:00 AM -2020.10.13 17:00PM [Code](#) [Video](#) [Doc](#)

Introduction: As the team leader, I led the team to participate in the **National Undergraduate Electronics Design Contest**. We designed an **Automatic Tracking, Identification and Measuring Device** in **four days and three nights**, which can recognize flat objects and three-dimensional objects and automatically measure its size and other information; Our project won the first prize in Anhui Province and is **the champion of this topic**.

## 6.SLAM-based Mobile Robot

Date: 2019.6 - 2021.6 [Doc](#)

Introduction: Our **SLAM-based Mobile Robot Project** is funded by the National College Students Innovative Entrepreneurial Training Plan Program(20,000 rmb), I was the **algorithmic finisher** on the project; In 2021, our Mobile Robot Project participated in The National College Students E-commerce Innovation, Creativity and Entrepreneurship Challenge and won the second prize, unlike other competitions, this is a commercial competition, and I represented my team at the defense in Kunming, China; In 2022, the selected represents Hefei University of Technology to participate in **The 15th National College Student Innovation and Entrepreneurship Conference, (4/1369)**.

# Patent

## 1.Older Care Robot(老年陪护机器人)

- China Design Patent,
- Patent Number: ZL201930437642.1
- Date: 2019.8.13

## 2.Automated Guided Vehicle(自动运输车(AGV))

- China Design Patent,
- Patent Number: ZL202130003562.2
- Date: 2021.1.5

## 3.Intelligent guide methods and systems based on image cognition(基于图像认知的智能导盲方法和系统)

- China invention patent
- Patent Number: 202010803198.2
- Date: 2020.10.29
